

In the Specification:

Please replace the section entitled "Brief description of the drawings" extending from page 7, line 25-page 8, line 11, with the following replacement section.

Brief description of the drawings

Figs. 1-10 depict some of the preferred embodiments of the method of the present invention wherein a substantially continuous thermoplastic coating is formed and adhered to a substrate.

More specifically, Fig. 1A shows the basic structure of a coating and laminating machine useful for operating the invention;

Figs. 1B and 1C show the basic structures of similar such machines; positions of the coating device;

Figs. 5A and B illustrate a lamination and a transfer-coating method according to the invention;

Figs. 6-10 illustrate laminations, including adhesive reactivation laminations, in accordance with the invention.

Fig. 11 is a plot of viscosity in units of mPas versus temperature in units of °C for Examples 1 and 7.
